WORK EXPERIENCE

Ruby on Rails full-stack developer, NDA

2018 – Present

Main projects

Project: SewSewYou

Full-stack, Ruby on Rails developer

Oct '19 – Present

Worked with turbolinks and coffeescript, integrated statistics with chartkick/highcharts charts and hypeauditor data, learned how to create different types of charts with highcharts (and which data format should be present per one). Added React to the project, configured webpacker for initial creating Design Flow functionality. Mostly worked on the front-end part of the app, I've been changing old design parts with new ones, refreshing styles. Worked with uploading images/documents etc. through the Active Storage services using AWS. Added filtering to the products, orders, product sales and other app objects. Worked with applying batch actions to the different items.

Technologies used: JavaScript, Ruby on Rails, Postgresql, Active Storage, React, Turbolinks, CoffeeScript, Slim

Project: Cablook

Full-stack, Ruby on Rails developer

Jun`18 – Ongoing

Participated in developing a front-end part of the application, transfer project front-end part from es6 js logic to React. Had some experience in work with payments systems through WAYFORPAY api, participated in fixing bugs and developing new features, and maintaining the project.

Technologies used: JavaScript, Ruby on Rails, Postgresql, Sidekiq, React, SCSS, Slim

Project: Fixpal

Full-stack, Ruby on Rails developer

Sep`18 – `Apr 19

Actively participated in developing the app, equally worked on the front/backend parts.

Worked with cloundinary images uploading for adding avatars/banners to the site, transforming them, etc. Fully changed in some designs on business pages. Made a new landing page with some switchers for all categories. Worked with filtering of businesses and other project database items, had some experience with Stripe api. Worked with many different js libraries that were included in the project. Got a lot of stuff to do it js files, so mostly worked with js files on the front-end part. Worked with tynymce for adding user ability to design his business description, like change font size, color, styling, etc. Have supported the project, integrating new features with the team, and maintaining the project.

Technologies used: JavaScript, Ruby on Rails, Postgresql, Sidekiq, Turbolinks, SCSS, Slim
